

Support for children with autism

Providing tailored services for children with autism, recognising the importance of early intervention in building a child's capacity through their early years.

We recognise the importance of early intervention in building a child's capacity through their early years. We have a team of specialists from different disciplines who can work in partnership with your child and family to understand their needs and deliver quality, tailored services to support them to achieve their goals.

Autism Testing

We provide assessments to determine if children (over 2 and half years old) meet diagnostic criteria for Autism Spectrum Disorder (ASD). Our Autism Assessment Clinics are staffed by a multidisciplinary team of clinical psychologists and speech pathologists. If your child is diagnosed with autism, our staff can support you through the NDIS process, with comprehensive resources and free advice.

Therapy

Our therapists can support children with autism with quality, evidence-based therapies.

Our team of physiotherapists, speech therapists, occupational therapists, pathologists and psychologists will work with your family and your child through their early years, through school and beyond.

We can provide therapy services in the home, kindergarten or school and out in the community. Our therapists can also support your family by providing tailored assistance, resources and information about autism.

We can also provide other assessments, including:

- fine motor
- play
- sensory regulation
- gross motor
- speech and language
- pragmatic and articulation assessments, and
- equipment prescriptions and application.

Positive Behaviour Support

We can provide support to your family and support network if your child is presenting with behaviours of concern. We can work together to develop strategies that build on your child's strengths, are based on developing positive relationships, communication and coping skills and address health, environmental and other impacting factors. We determine the reasons for behaviours of concern and provide targeted strategies on how to support your child to decrease their reliance on that behaviour to have their needs met.

Assistance with Daily Living

We provide tailored Assistance with Daily Living supports and skills development. Our supports are flexible and tailored to your child's needs and goals. Whether it's at home or in the community, we can provide one-to-one support for a range of tasks, seven days a week.

Recreation

We can support children to participate in any recreational activities they enjoy. Our holiday programs and camps are a great opportunity for children and young people to learn, make friends and have fun in a fully supported environment. Where possible we group children together with other children with similar needs.

Support Coordination

We provide Support Coordination services, which helps you implement your child's NDIS plan and find the right service providers. Our expert team is experienced in the NDIS and can work with you to identify the best supports for your child's needs, including obtaining quotes and setting up Service Agreements. We offer Support Coordination and Specialist Support Coordination.

Yooralla can support you to navigate the NDIS for your child

The National Disability Insurance Scheme (NDIS) can be confusing, but we're here to help! We offer free NDIS consultations and resources to help you understand the NDIS at any stage of your child's journey.

Communication and Assistive Technology

We support children to enhance their lifestyle and communication through information and access to assistive technologies and equipment, including recommendation of communication devices.
